nyansapor™

Easier & Relevant Analytics
for everyone who needs it

Discover new insights using powerful and affordable analytics

New insights gained from the information you already have can transform the way you manage your organization, and everyone can contribute to that transformation. Using Nyansapor, decision-makers in your organization can leverage intuitive and powerful analytics to easily analyze data and experience that "a-ha" moment of new and improved insights.

Nyansapor offers a whole new way of insight discovery, by bringing greater speed and value to analytics and making it affordable, easy to use, and available to everyone who needs it rather than a selected few.

"Best fit" analytics

Nyansapor delivers a complete analytics solution that fits your needs, budget, and deployment time-frame. Implementation is a fraction of the cost of other analytics solutions and takes a fraction of the time…... without compromising on power and features. There is no need to wait for many months and spend millions just to get the same powerful analytics. Get started quickly and start seeing benefits within a few months.

The same intuitive interface allows non-technical users to utilize wizards and menus to analyze data and create their owns report & dashboards, while power-users can leverage advanced capabilities to perform complicated analysis.
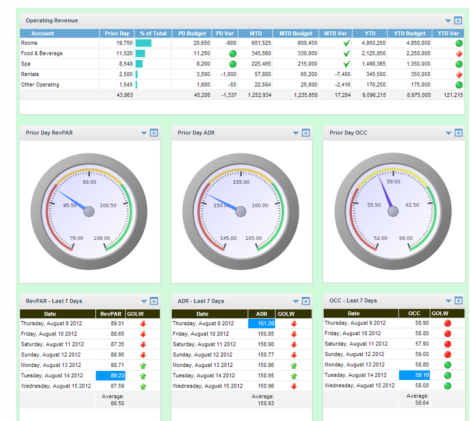

Mobile access to your analytics

Nyansapor provides your users with a compelling mobile analytics experience by enabling secure access to their dashboards and reports on mobile devices, via native apps for iPhone and iPad. There is no learning curve and no need to build anything mobile-specific. All reports and dashboards published via the application are immediately available on mobile devices in a visually consistent manner and as interactive.

Shift analytics to the front-line of your organization by making relevant information easily available to your front-line decision makers to help add value at every level.

Combine your data sources into a single holistic view

Nyansapor provides the connectivity to enable you grab, merge, analyze, and report from multiple disparate data sources, no matter where the data resides.

Be it Relational, OLAP, CSV or Big Data, Nyansapor can connect to it.

Self-service dashboards enable users to analyze information from different perspectives quickly and easily.

Key Features

- Self-service reporting and dashboard creation via intuitive user interface

- Simple connectivity to more than 30 different data sources; including relational and multidimensional sources, and even CSV files

- Connect to, combine and analyze data from multiple sources like HR, finance, marketing, and external data....all within Nyansapor

- Integrated collaboration tools with features such as; threaded discussion forums, sharing, decision & polling widgets, comments, and annotations

- Built-in mapping tools using Google Maps, GIS data sets, and WMS

- Native mobile apps for iPhone and iPad with no re-work required

- Easy administration using the same intuitive browser interface

- Deploy on major operating systems; Windows, Linux, Solaris, and Mac OS

- Enterprise-level scalability to meet your needs. Use it for a single department or the whole organization

- Robust security model that can be integrated with your existing security and authentication systems such as LDAP

- Robust user access control and multi-tenancy deployments

- Embed dashboard and reports anywhere using JavaScript API

Create insightful visualizations by putting your data on maps using Google Maps, GIS data sets, and WMS.

Available on the App Store
