Healthcare

Valuable insights to improve population health

Nyansapor Healthcare™ provides you with a powerful yet easy-to-use analytics solution to enable healthcare information seekers gain an improved level of data transparency. Decision-makers at all levels also obtain new perspectives and insights to drive improvements in the quality of patient care, cost efficiency, and overall organizational performance.

- Easily access and monitor key metrics and performance indicators to prevent readmissions
- Obtain at-a-glance holistic view of the health of your population
- Self-service analytics that everyone can use
- Easily create your own analytics models for better evidence-based standards of care

Easily scalable with your needs

Non-disruptive integration with your existing IT infrastructure

Choose Nyansapor Healthcare™ to enable you:

- ✓ Gain faster time-to-value with pre-built healthcare analytics dashboards and reports
- ✓ Simplify deployment and maintenance
- ✓ Benefit from significant ROI & cost savings

Shift analytics to the front-lines by making key information easily available at the point of care and wherever it is needed most

## Powerful analytics you can afford with less IT headaches

### Self-service dashboards & reports

Healthcare personnel at the point of care can be empowered to securely access, analyze, and monitor the information that matters most to them. Intuitive drag-and-drop tools and wizards enable users to create and/or modify dashboards & reports in a few simple steps. All this done easily and with minimum technical know-how.

### Brilliant mobile analytics

Healthcare analytics dashboards and reports can be securely accessed on mobile devices, via native apps for iPhone and iPad. There is no need to re-create anything mobile-specific. All reports and dashboards created via the application are immediately available on your mobile device.

Real-time analytics where and when you need it!
